

E-Commerce Sales & Customer Analytics

Business Insights & Recommendations

Metric	Result
Revenue	208M
Profit	49M
Orders	8,000
Customers	500
Units Sold	17K
Return Rate	8.14%

1. Electronics is the strongest category

Finding: Electronics generates the highest revenue and highest profit, making it the most valuable category in the business.

Recommendation: Prioritize Electronics inventory, marketing and product availability while monitoring its return rate.

2. Laptop Pro 14 is the top-performing product

Finding: Laptop Pro 14 ranks first in both revenue and profit, making it the strongest individual product.

Recommendation: Maintain healthy inventory levels and consider promotional campaigns around this product.

3. June 2024 recorded the highest revenue

Finding: June 2024 was the strongest month for revenue, indicating a significant sales peak.

Recommendation: Investigate promotions, product demand, discounts and customer activity during this period and replicate successful strategies.

4. Riya Das is the highest-value customer

Finding: Riya Das generated the highest customer revenue among the analyzed customers.

Recommendation: Target high-value customers with loyalty programs, personalized offers and retention campaigns.

5. Overall return rate is 8.14%

Finding: Out of 8,000 orders, 651 were returned, giving an overall return rate of 8.14%.

Recommendation: Monitor returns closely because reducing avoidable returns can improve profitability and customer satisfaction.

6. Wrong Product is the leading return reason

Finding: Wrong Product is the most common return reason, suggesting potential issues with product selection, product information, order processing or fulfillment accuracy.

Recommendation: Improve product descriptions, SKU verification and warehouse order-picking checks.

7. Electronics has the most returned orders

Finding: Electronics is both the highest-performing category and the category with the most returned orders.

Recommendation: Compare return rate—not only return volume—to determine whether Electronics has an unusually high return problem.

8. November 2025 had the highest return activity

Finding: November 2025 recorded the highest number of returns.

Recommendation: Investigate orders from this period for common products, return reasons, promotions and fulfillment issues.
